Bibliography

The Cognitive Document LLM Aggregator is an advanced software tool designed to streamline the process of aggregating and organizing large volumes of documents. Leveraging cognitive computing capabilities, it employs natural language processing (NLP) and machine learning techniques to automatically categorize, tag, and summarize documents based on their content.

PROBLEM IDENTIFICATION

JOURNALISTS
AND MEDIA
PROFESSIONALS

RESEARCHERS
STUDENTS AND
ACADEMICS

FINANCIAL
ANALYSTS AND
INVESTORS

It saves ample amount of time and makes the process effortlessly convenient.

Some more Examples include -

- Government Agencies and Policy Analysts
- Business Analysts and Consultants
- Legal Professionals

TECHNOLOGY USED

LangChain

Pinecone

miro

***Frontend**

Approach

- Simplicity with Robust Backend
- Can handle multiple files at once
- All errors and logs in streamlit CLI

Cognitive Document LLM Aggregator

Prime focus

- Unlocking the Power of LLM
- Intuitive UI: Simplifying Complexity for Seamless Document Analysis and only functional UI elements

Process

what is the story about

The story is about three individuals: Aman, Himanshu, and Govind Sir, who come together to create a cognitive document aggregator. Aman is a creative entrepreneur with big dreams, Himanshu is an experienced businessman, and Govind Sir is their wise mentor. Together, they face challenges and triumphs, ultimately building a successful business while forging strong bonds and learning valuable lessons along the way. It's a tale of perseverance, collaboration, and the beginning of a new journey.

who is the main character here

The main characters in the story are Aman, Himanshu, and Govind Sir.

what bussiness idea they had

Aman, Himanshu, and Govind Sir had the business idea to revolutionize the way people accessed legal information through a cutting-edge document aggregator. With Aman's creativity, Himanshu's experience, and Govind Sir's wisdom, they created a cognitive document aggregator

Conclusion

This project addresses the challenges of data overload and information retrieval, paving the way for more efficient and effective document analysis practices.

Our solution enables users across various industries to enhance productivity, make informed decisions, and uncover valuable insights from their document repositories.

CONCLUSION & FUTURE SCOPE
